# EVENT OVERVIEW

JECRC Cloud Summit is an event organised by JECRC Foundation to promote and acknowledge the importance of cloud computing. Through this program, students can gain experience with the next big thing while also being motivated to captivate as many big players as possible. The event will begin on [redacted] and will last three days, with a jam-packed schedule of excellence.

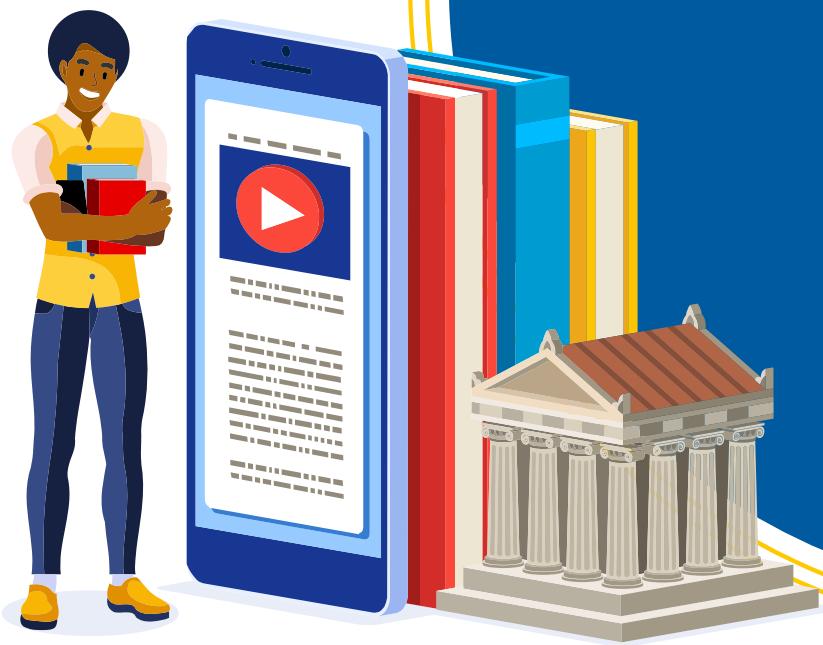

**Day 1 :** The first day will feature a talk session with honorary guests, followed by an interactive quiz to learn about Google Cloud's newest innovations and an AI-based workshop.

**Day 2 :** Emphasis on unifying data and smart analytics using cloud-based applications, panel discussions with the startups CEO community and working projects on azure.

**Day 3 :** Which is its concluding day, is mostly devoted to databases. It tries to use AWS to build a management system and a customised Alexa, and on top of that, it throws in some cultural activities to kick off this voyage with a bit of wit and mint.

# ABOUT **JECRC FOUNDATION**

One of the most favoured educational institutions in North India is JECRC Foundation, Jaipur, which is also listed among the best universities and colleges in Rajasthan. With institutes for engineering, business, pharmacy, pure and applied sciences, among other things, the Foundation is a top provider of education. It seeks to develop useful resources for business and society through its interventions in the growth of research and innovative culture, academic and professional advancement, along with cultural enrichment.

We take great pride in sharing this moment of ecstatic joy and profound satisfaction as JECRC has been accredited by NBA (National Board of Accreditation) and JECRC University has been accredited by NAAC (National Assessment and Accreditation Council), both esteemed bodies of MHRD, Govt. of India. This has opened up new opportunities for students in their pursuit of higher education at the most prestigious universities in the world, easier access, and more. Among its most well-known characteristics are a robust research culture and strong industry linkages.

# ABOUT JECRC CLOUD SUMMIT'22

The JECRC Cloud Summit'22 is a technical gathering for aficionados of cloud computing, artificial intelligence, and other relevant subjects. We're giving up-and-coming talent a place to congregate, exchange thoughts and opinions, interact with like-minded individuals, and talk about their plans with professionals in the field. By joining us, you will learn about the hottest subjects in the tech business today, gain practical advice on how to execute your ideas and plans, and have an unforgettable experience that will benefit you long beyond the event.

# AIM

Companies all over the world have reached a technological tipping point, which has created a slew of new challenges for leaders, some of which are IT, Transformation and Cyber Security. As a result, in order to contribute to the noble cause, the JECRC Cloud Summit aims to provide access to sessions delivered by delegates who are experts in their domain from across the country. We want to provide a platform for aspiring tech leaders to interact and connect with industry experts and exchange ideas and perspectives on topics like cloud computing, machine learning, artificial intelligence, IoT, and much more, as well as hands-on practice.

# WHAT MAKES THIS SUMMIT SPECIAL ?

You will learn things during the event that will help you and your company advance. You'll have the chance to learn the most recent tips on how to use the cloud to your advantage from our opening keynote through sessions to spotlights on participants and partners.

The JECRC Cloud Summit is a premier cloud business and technology event in Rajasthan that brings together major cloud platform providers, top speakers from around the world, influential customers and thousands of delegates. It also provides an excellent setting for business networking for all participants. The Cloud Summit is the ideal education and professional opportunity since it provides cutting-edge business and technology material in both the business and technology spheres.

Learn about breakthrough solutions in data, machine learning, collaboration, security, sustainability, and other areas first. You'll hear from experts, consider customer viewpoints, participate in interactive demos, and acquire insightful information that will speed up your career change.
